

Installation & update of BridgeTabs without Internet

This instruction assumes that the [instructions on how to set up the BridgeTabs](#) have been followed. i.e. that Airdroid and BridgeTab apps are installed to the tablet and that you have [downloaded the BT app](#) (bridgetab.apk) to your computer. The same principle can be followed at first install of BridgeTab as you can install *Airdroid on Computer* from Google Play Store to your tablets.

Note that the appearance differs depending on what the Android version you have.

Use BT as home in the hidden [TD menu](#) to get out of the BridgeTab mode.

1. START AIRDROID

2. SELECT CONNECTION

3. NOTE IP

ON PC

4. TYPE AIRDROIDS https:// (in PC's Browser)

Please accept the connection on your device.
You may need to wait for a few seconds for the alert to appear on your device.

5. ACCEPT CONNECTION

ON PC

6. OPEN FILES

7. OPEN DOWNLOAD

8. SELECT UPLOAD

9. SELECT (or drag & drop) FILES

ON PC

10. CLOSE Select Files WINDOW

11. DOUBLE CLICK BridgeTab

12. INSTALL BridgeTab

13. CONFIRM (on the tablet)

Alternative method

This method requires that you have the BridgeTab.apk on a USB memory.

1. CONNECT USB MEMORY

Use the OTG adapter that you got with the tablet if you cannot insert the USB stick directly.

2. START File Manager

3. SELECT USB

4. OPEN usbhost

5. SELECT BridgeTab.apk

6. CONFIRM INSTALL
